Algorithms Dasgupta Papadimitriou Solutions Manual
1 Algorithms with Numbers 1.1 To start, the case of $b = 2$ is proved by first maximizing the value of the three single digit numbers that are going to be added together, call it a . So then $a = b-1$. Adding three of those together would then be $3 a = 3 b-3 = 3 = 0 b 11$, which is a two digit number. The cases from 3 a can be generalized as follows.
