Composite drawing uses descriptions given by witnesses to create a drawing that is a useful tool for identifying or eliminating a suspect. A composite drawing is not intended to be a portrait of an individual, but more of a two-dimensional likeness that is a visual record of the witness' recollections. Creating a composite drawing requires skill that goes beyond the technical.

Composite Drawing: Techniques for Architectural Design ...

An engineering drawing is a type of technical drawing that is used to convey information about an object. A common use is to specify the geometry necessary for the construction of a component and is called a detail drawing. Usually, a number of drawings are necessary to completely specify even a simple component.
