Speaking of the binding, also consider the type of binding for
your manual. If your manual has a lot of pages, you need to
bind them together correctly. Otherwise your manual might
fall apart when your user reads through it. There are different
types of binding you can use for instruction manuals. The side-
stapling type is inexpensive.

Use lists for instructions. Tasks consist of a series of individual steps that people follow in a specified order, so it makes sense that you should always use numbered lists for tasks. The numbered list helps the user to visualize the order of the steps in the task. Compare the two instruction manual examples below that describe the same task.
