An elevator planning guide, also known as a design guide, is a document which contains a number of the details necessary for the inclusion of an elevator into a construction project. These guides are primarily targeted to meet the needs of the architect and general contractor working on the project, but provide everyone with valuable information on the standard and optional features of the elevator.

Elevators. Elevators have a wide range of applications but their basic specifications remain the same across many industries. While industrial, hospital, and freight type elevators are defined mainly by their dimensions, purpose, and capacity, commercial and residential elevators provide more freedom for design. Determining the car capacity and which type of elevator hoist mechanism to use is ...
